

Environmental and Temperature Monitoring for the Pharmaceutical & Biotech Industry

FEATURES

- Multiple Operating Modes: Motion Tracking, Geozone Detection etc.
- Geofencing Zone Detection
- Edge Computing for Proximity Detection and Exposure Assessment
- Predictive Maintenance Sensors
- ATEX Rated
- Water Proof Enclosure / Leak Detection / Metering
- Cloud Connectivity or On Premise
- Magnetic USB Connector for Rechargeable Battery/Replaceable AA Batteries
- Open API / Firmware Upgrade
- Connection to BMS or SCADA

BENEFITS

- Covid-19 Safe Return to Work - Occupancy Heat Maps & Contact Tracing
- Tag Wearer Proximity Notification with Centimetre Accuracy
- Indoor and Outdoor Asset & People Tracking
- SOS Button
- Access Control & Density Policy Enforcement
- Real-Time Management of Hazards
- Anti-theft Detection & Danger Zones/Restricted Area Access Notifications
- Sanitisation of Shared Assets
- Parking Management
- Delivery/Materials/ Product Tracking
- Temperature and Humidity Monitoring and more...
