

Anti-theft & bike-finder module

For invisible installation in handlebar of

- » Bikes / E-Bikes
- » E-Scooters etc.

No additional cost –
3 year network usage included!

Function

CyLock – the innovative anti-theft alarm & bike-locator module, which easily fits inside handlebars, invisible from the outside. This makes the CyLock module tamper-proof.

Bike stolen? CyLock helps you to find your bike. CyLock notifies you by app when someone tries to steal your bike – and in the event of theft, helps to get your bike back via GPS.

Thanks to the newest mobile technology, CyLock transmits through the bike handle and needs very little energy (approx. 1 year protection with a single battery¹⁾).

No additional network usage costs – a 3 year “lifetime-fee” for mobile connectivity (NB IoT) is included!

In addition the CyLock-App provides an additional set of useful bicycle-specific features. You can even add an attractive bicycle insurance as an option.

Useable in EU-Countries:

D / A / NL / PL / CZ / H / SK / GR

Installation

“grip of – module in – grip on”

i Module can be secured via safety screw optionally.

¹⁾ Battery lifetime depends on a variety of factors such as usage intensity of the device, settings, temperature or mobile network availability.

App

CyLock-App related to the module:

Minimum required

 **Android 6**

 **iOS 9**

BIKE EDITION

Additional bicycle-specific features included

 **Alarm (CyLock)**

 **Bike Pass**

 **Breakdown**
