

# Ultrasonic Distance Sensor EM400-UDL

*Milesight*

EM400-UDL is a non-contact ultrasonic distance sensor designed for outdoor applications such as monitoring water level, fill level of tanks and silos, presence of objects, or snow level. It features multiple selective probes with varying detecting ranges to meet diverse requirements. With high protection IP rating and waterproof enclosure, EM400-UDL can withstand harsh environments, and it can work up to 10 years with two 9000 mAh batteries.

Milesight offers LoRaWAN<sup>®</sup> version and NB-IoT/Cat.M version to meet different communication needs. The LoRaWAN<sup>®</sup> version can be integrated with Milesight LoRaWAN<sup>®</sup> gateway and Milesight IoT Cloud solution, enabling remote and visual management of all sensor data. The NB-IoT/Cat.M version not only supports multiple application modes to compatible with IoT platforms, but also is equipped with GNSS for tracking and security purposes.
