

Modbus to LoRaWAN® interface

This interface can be connected to any Modbus device to read and write any register of the connected device through the LoRaWAN® platform.

Configuration is simply made using a configuration file uploaded to the interface via USB or downlink.

Reliable

Suitable for use in the **industrial field**

Flexible

Remote configurable

Easy to use

Several ways available for programming, even in the field

Powerful

Two-way communication with connected devices

Remote industrial interface

Remote process supervisor

MCF-LW06485

Modbus to LoRaWAN® interface

Applications

- · Remote industrial interface
- · Remote process supervisor

Specifications

- CPU Cortex M4
- RTC
- EEProm 32KB
- Flash 1MB
- Encryption AES 128 bit
- · LiPo rechargeable battery
- · Class C LoRaWAN® stack EU868, AS923, AU915, US915
- Modbus RTU RS485
- USB On The Go
- IoT node setup ad firmware upgrade via USB interface
- Power supply 10-36Vdc
- Storage temperature range -20 +80°C
- Working temperature range -10 +70°C
- Dimensions LxHxP: 81x60x24mm
